Create the ultimate home theater experience.

4 areas of light

Home Theater IR Package

Control four areas of light with this infrared (IR) integration package.†

Use a popular multi-function IR remote* to integrate lights with other home theater components, or recall favorite lighting scenes with the Lutron IR remote.

Home Theater IR Package (RALB-HT-IR-xx)

Enables simplified infrared control of lights and A/V components.

- package includes:
- (4) 600W dimmers
 - (1) tabletop master control
 - (1) signal repeater
 - (1) IR remote control
 - (1) IR interface

Touch a button on your tabletop master control to set the scene for movies, music, intermission or entertaining.

dimmer replaces existing dimmers or switches to control individual lights in each room

infrared receiver receives IR signals from universal and learning remote controls

tabletop master control controls system lights and scenes from anywhere in your home

RS-232 interface communicates with touchscreen/ computer-based systems

infrared remote control create and recall up to four lighting scenes in your home theater

signal repeater ensures reliable communication between system components

You have carefully selected each audio and video component for the best picture and sound.

Now, complete your home theater with RadioRA lighting controls.

- Eliminate glare and video washout created by lights at full bright
- Prevent eyestrain resulting from complete darkness
- Control home theater components and lights together—with a single multi-function remote, PC or touchscreen*
- Adjust the light within your home theater, or illuminate a path to other rooms from the comfort of your couch

4 areas of light

Home Theater RS-232 Package

Control four areas of light and connect to your home theater system.†

Integrate your lights with other components* for simplified home theater control.

Home Theater RS-232 Package (RALB-HT-232-xx)

Integrates light control with a touchscreen controlled system.

- package includes:
- (4) 600W dimmers
 - (1) tabletop master control
 - (1) signal repeater
 - (1) RS-232 interface

Press Play:
Lights slowly dim and the movie begins.

Press Pause:
Movie pauses as lights brighten slowly, creating a pathway to other rooms.

With a RadioRA® home theater package, your lights and other home theater components will operate in perfect harmony—creating a true cinematic experience.*

The movie begins when the lights start to dim.

† An area of light consists of a light—or group of lights—controlled by one switch or dimmer, in one or more locations

* Optional components are available from other manufacturers
